top Filter Default levels

```
> function a() {  
  return {  
    arg: 1  
  }  
}  
  
const { variable } = a();  
undefined
```

< undefined

> Explanation:
-because of destructuring works in JS
-a() returns an object {arg:1} it has no variable property "variable"

Must Be:

function a() {
 return {
 arg: 1
 }
}

const { arg } = a();
console.log(arg)

Uncaught SyntaxError: Unexpected token 'of' VM536:2

```
> function a() {  
  return {  
    arg: 1  
  }  
}  
  
const { arg } = a();  
console.log(arg)  
1
```

undefined VM542:8

```
> function a() {  
  return {  
    arg: 1  
  }  
}  
  
const { variable } = a();  
console.log(variable)  
undefined  
undefined  
< undefined  
>
```

undefined VM612:8
